

October 5, 2015

Irwin,

I cannot thank you enough for giving our school the one aspect I was unable to implement on my own! Your sterile space program has given our parents peace of mind, and as a new and unfamiliar brand this meant leaps and bounds! The ability to tell potential families that our school is sterile-clean is something I cherish tour after tour.

As a new name and school opening up in a heavily populated area, your program has really given us another characteristic to help us stand out. Parents feel comfort in knowing our school has fewer, and less contagious illnesses floating around for their precious little ones to catch. As our school expands each month the illness level has continued to remain low throughout the building.

Most importantly you are such a personable individual, and in the educational field we find comfort in individuals like yourself! Your visits are always eagerly anticipated as our teachers view your results as friendly competition to see which room is the most sterile! Thanks again for providing our school with your service and continuing to follow up with the overall success of your product.

Best,

Taylor Wapelhorst

Director
