Irwin Stromeyer
Sterile Space Infection Defense

Dear Irwin,

It has been a pleasure to work with you on consultation and implementation of your services for our daycare center. Your experience and knowledge of infection prevention for daycare centers is top notch. It is a pleasure working with someone who is patient and communicates clearly on issues and solutions. You made it easy to understand and easy to make the decision to use your service.

It was comforting to see that you always came back to answer any questions or handle any issues that came up. I especially appreciated that you dropped off those micro-fiber cleaning cloths as promised, not once, but multiple times. Your quarterly testing reports on how well the coating was working always put me at ease. It also helped that I could actually see fewer students getting sick.

I would be happy to recommend your service to anyone who calls me about it. I feel other centers will definitely benefit from using your company.

Thank you again for doing a great job.

Very Truly Yours,

Donna Targonski, Director
