To Whom It May Concern;

I have been working with Sterile Space Infection Defense since October 2015. I originally tried the service because I felt we were constantly inundated with the spread of colds, viruses, and infections of every variety. Sometimes it would be confined to one class and sometimes it would affect the whole school.

The issue for us was that we did a really good job of cleaning and disinfecting, but couldn't believe that what we did wasn't good enough. I decided to give Sterile Space a try. Now, I faithfully treat the school each year. We have cut the number of infectious outbreaks from several a month through the winter months down to three or four a season.

The great advantage to having this service is that we get Irwin to help see us through any questions or situations that arise. He is always responsive and has an excellent understanding of his field. I have learned so much about the spread of infection from Irwin. He has done training for my staff which has made a huge impact on the way they care for their classrooms, materials and children. I hope this letter is helpful. Please feel free to contact me for any further conversation you made need.

Yours truly,

Lorraine Grasso Confair
Director
