To Whom It May Concern:

Our schools, Cresthill Academy, with five locations in metro NYC/Northern NJ have been using Sterile Space Infection Defense for over 5 years. Our directors like that Sterile Space provides an extra level of defense against illness and germs, and our parents enjoy the added peace of mind.

We have enjoyed working with Irwin Stromeyer since the very beginning, as he is a true professional and goes above and beyond for his clients. He is quick to action during any type of outbreak and aids us in every possible way. Below are statistics relating to Sterile Spaces and its effectiveness.

	Prior to SS	Post SS	Other
East Hanover	2-3 children per month	2-3 children every 2-3 months	East Hanover is a center with over 120 kids, so this would be the most statistically significant result. The center also operated for 1 year without Sterile Spaces, so observation of before and after spray affects were possible. The center is 6 years old. This represents a 50% to 70% reduction.
Lyndhurst	No change	No change	Lyndhurst is a center with a very small enrollment, not statistically significant. The center is 7 years old.
Hoboken North	No data-opened center with SS	No data-opened center with SS	From our center director” Most recently we had 5 cases of RSV (airborne) then sterile space came and we have sent 0 children home since. Previously with coxsackie we sent 8 home then following 3 (those children were diagnosed with a different strain).” The center is 2 years old. Sterile Space works well.
Hoboken South	No data-opened center with SS	No data-opened center with SS	From our center director “I believe the spray does help our center. It acts as an added bonus for each room on top of the daily cleaning we all do! I always highlight it on tours and parents seem comforted by it, plus the illnesses seem to stay contained in one room whenever there is an outbreak. “ The center is 2 years old.
Harrison	No data-opened center with SS	No data-opened center with SS	No observable data as center is still under soft opening. The center is 2 months old.
