Dear Irwin,

After hearing about your Healthy Patient Zone program for dental practices, I felt it was a great program for protecting my patients and staff from unnecessary infections. I am very happy that I chose to have the service performed at my office. Even though we try very hard to keep the office clean and healthy, it is still a major challenge to prevent infection these days.

Since having the service performed, my staff and patients like knowing that they have a much lower chance of catching an infection at the office. I know it will help in reducing sick days for both the staff and patients. I would highly recommend your service to any physician I know. If anyone needs a reference for your services, just have them call me.

Sincerely,
Union Dental

Donald Pasquariello, DMD
